

# Classic Flanger v1.05 by Kjaerhus Audio

## Description

Classic Flanger will give you that subtle or massive swirling effect that is used mainly for guitar, but can be used for many other instruments as well. Due to a tightly controlled feedback path, it is possible to boost the flanging effect to maximum without getting unwanted side effects.

Classic Flanger is a part of our Classic Series, a series of free VST plugins. Check our site <http://www.kjaerhusaudio.com> frequently to check for new free VST plugins and tips on how to use them.

## License Agreement

Classic Flanger is a free download on our site <http://www.kjaerhusaudio.com>. All algorithms and Graphics are exclusive designed by Kjaerhus Audio, all rights reserved. You are not allowed to sell or give away this plugin. If you know anyone who is interested in a copy of this plugin, just ask him or her to go to our site and download it. If you got this plugin from any other source than our site, please don't use it! – Go to our site for a fresh download.

If you are a Webmaster please follow these rules: You are not allowed to link directly to our archives (hot linking). If you want to link to our site we appreciate it, but please link to our main page.

## Installation

Copy the “Classic Flanger.dll” file to your VST plugins folder.

## Known issues

This plugin is tested very thoroughly and to our knowledge there is no issues. If you run into any problems, with this plugin, please let us know. You can send an email to [info@kjaerhusaudio.com](mailto:info@kjaerhusaudio.com).

## Version history

Version 1.05 (19. November 2003):

Fixes:

- Improved GUI update using fewer resources.
- Fixing problem when used in AudioMulch.

Version 1.04 (13. October 2003):

New:

- New Logo.
- About box will open when the Logo is clicked.

Fixes:

- Dual Monitor problem fixed.
- In the v1.03 the Feedback parameter was accidentally set to control the Depth instead of the Depth parameter, which was ignored. The problem is now fixed.

Version 1.03 (9. September 2003)

Fixes:

- Noise burst problem introduced in the last update fixed.

Version 1.02 (7. September 2003):

New:

- Improved smoothness in the high frequency range.

Version 1.01 (27. August 2003):

Fixes:

- Problem when used in some wave editors with SYNC enabled now fixed.

Version 1.00 (21. August 2003):

- First release.
